

TRV-R TACTICAL RESPONSE VEST

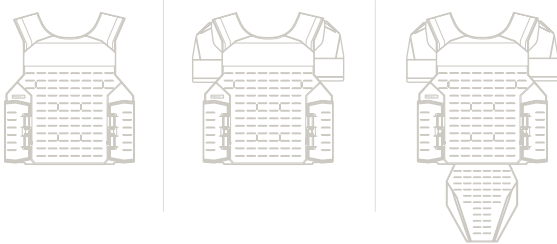

The PROJECT7 **TACTICAL RESPONSE VEST - RETRO** (TRV-R) is built specifically for narcotics units, fugitive task forces, K-9 officers, and tactical medics. The TRV-R is a moderate coverage entry vest with a fixed shoulder design that is scalable by the addition or removal of upper arm and groin protectors. TRV-R is a “soft armor first” system which utilizes soft ballistic armor as its primary coverage, but allows for the installation of 10”x12” or SAPI sized hard armor rifle plates. TRV-R is available in 15 platform sizes with the Three-Piece Cummerbund (3PC) available in 8 lengths.

KEY FEATURES

Key features for **TRV-R** include:

- Clean, low profile design to provide moderate coverage with enhanced comfort for extended wear
- Rapid scalability to add upper arm and groin ballistic protection in seconds
- PROJECT7’s “Structured-Texture” shoulder design provides a soft, natural, and high friction shooting platform unencumbered by buckles, straps, external pads, or overlapping armor
- Patent pending, Three-Piece Cummerbund (3PC) design for operator specific sizing, ideal weight bearing, with broad adjustability, and rotational flexibility for unrestrained movement
- Internal radio routing channels to eliminate cables on the surface of the platform
- SAPI based hard armor coverage sized to the individual operator provides greater protection, even for larger operators
- Traditional MOLLE/PALS load bearing surfaces built from Blue Force Gear Ultracomp for increased strength and decreased weight
- Bar tacked anchors for the installation of PROJECT7 ILB Packs and 1PS Single Point Slings
- First-Spear Tubes or one-way hook and loop closure systems
- User replaceable cummerbund and upper arm elastic
