

MPR MARITIME PLATE RACK

The PROJECT7 **MARITIME PLATE RACK** (MPR) was built for one of the top counterterrorism teams in the world. Designed to serve a wide variety of maritime mission sets including rebreather diving, ship recapture, small boat assault, heli-casting, and tactical swimming, the MPR is perfect for any application where there is the potential of ending up in the water. Built from hydrophobic materials to reduce water absorption, the MPR features air and water drain holes for rapid sinking or drainage. The MPR has the ability to carry front and rear rifle plates as well as flotation devices and buoyancy neutralizers. The MPR is also compatible with a wide variety of accessories to allow for the integration of rebreathers, buoyancy compensators, and backpacks.

KEYFEATURES

Key features for **MPR** include:

- Integrated air and water venting/drainage system – The MPR was built for the water and as a result has drainage holes and air vents throughout. This allows it to sink quickly for diving applications, yet drain quickly when exiting the water.
- Specialty Closures –Water can disrupt traditional hook and loop closures, as a result the MPR features numerous types of specialty hook and loop, as well as double reinforced closures to ensure a solid, robust closure for operator rescue or climbing applications even when submerged.
- Maritime Three Piece Cummerbund (3PC) – The MPRs Three Piece Cummerbund (3PC) is a non-ballistic, low-profile cummerbund providing webless MOLLE surfaces on the outside of the cummerbund as well as on the inside to allow the attachment of the PEI Detachable Modular Flotation System. The cummerbund also features draining internal pockets for carrying a radio and/or two M4 magazines.
- The MPR is available in OD, Black, or Multicam and in 24 sizing combinations for 10"x12" or SAPI M, L, or XL plates.
