[see diagram on page 2] The SPR is designed for special operations personnel who have a broad range of missions including high speed dynamic entries, linear assaults, vertical access work, and rural operations.

SPR's LATEST UPDATES include:

- Optional soft-armor yoke protector
- Optional lower abdominal soft-armor protector
- Optional spine soft-armor protector
- Optional in-cummerbund adaptive pouch system
- Optional FLEX loadout systems

KEYFEATURES

Key features for **SPR** include:

- PROJECT7's "Structured-Texture" shoulder design provides a soft, natural, and high friction shooting platform unencumbered by buckles, straps, external pads, or overlapping armor
- Patent pending, Three-Piece Cummerbund (3PC) design for operator specific sizing, ideal weight bearing, with broad adjustability, and rotational flexibility for unrestrained movement
- Internal radio routing channels to eliminate cables on the surface of the platform
- SAPI based hard armor coverage sized to the individual operator provides greater protection, even for larger operators
- Webless or Traditional MOLLE/PALS load bearing surfaces
- Bar tacked anchors for the installation of PROJECT7 ILB Packs and 1PS Single Point Slings
