

SPR-R SCALABLE PLATE RACK

The PROJECT7 **SCALABLE PLATE RACK - RETRO** (SPR-R) is a moderate coverage platform built for operators who need a compact armor platform yet still want broad coverage with scalability. The SPR-R is designed for special operations personnel who have a broad range of missions including high speed dynamic entries, fast roping, linear assaults, vertical access work, and extended rural operations. Built to be rapidly scaled to individual missions, SPR-R is a “hard armor first” design that utilizes hard armor plates for primary torso protection and incorporates soft armor for side and extremities protection.

KEY FEATURES

Key features for **SPR-R** include:

- Streamlined, athletic design to provide full range of motion, allow normal shooting positions, and unprecedented comfort
- PROJECT7’s “Structured-Texture” shoulder design provides a soft, natural, and high friction shooting platform unencumbered by buckles, straps, external pads, or overlapping armor
- Patent pending, Three-Piece Cummerbund (3PC) design for operator specific sizing, ideal weight bearing, with broad adjustability, and rotational flexibility for unrestrained movement
- Internal radio routing channels to eliminate cables on the surface of the platform
- SAPI based hard armor coverage sized to the individual operator provides greater protection, even for larger operators
- Traditional MOLLE/PALS load bearing surfaces built from Blue Force Gear Ultracomp for increased strength and decreased weight
- Bar tacked anchors for the installation of PROJECT7 ILB Packs and 1PS Single Point Slings
- First-Spear Tubes closure system for secure closure and rapid donning and doffing
- User replaceable cummerbund and upper arm elastic
- Available in Medium, Large, and X-Large platform sizes with eight different cummerbund sizes to ensure perfect fit
