

ILB-SC

INTEGRATED LOAD BEARING SCABBARD PACK

The PROJECT7 **INTEGRATED LOAD BEARING SCABBARD PACK** (ILB-SC) was purpose-built in response to real-world operator feedback. Teams were fed up with traditional zip-on packs that lacked structure, couldn't carry heavy loads, and bounced or made noise during movement. The ILB-SC changes all that.

The ILB-SC delivers a secure, streamlined fit for high-demand missions. Constructed with a rigid internal frame, the ILB-SC maintains its shape under load, allowing you to carry heavy gear like bolt cutters and breaching tools (when paired with the scabbard insert) without sagging, bouncing, or shifting. Designed to integrate tightly with your armor platform, the pack stays silent and stable during high-speed movement. Its modular build gives teams the flexibility to configure it to their exact mission needs.

KEY FEATURES

Key features for **ILB-SC** include:

- Two (2) External 6"x 9"x1.5" padded pockets with 4 large elastic loops and 4 small elastic loops to hold flashbangs and less lethal, med supplies securely, as well as a zippered admin pocket
- Large 13"x9" padded internal main compartment to hold larger gear, such as night vision, small breaching tools, or a hydration system up to 100oz using the sewn in loop. The main compartment also includes two attachment points that allow for tension to be set on the scabbard insert, as well as a zippered pocket
- 1x6 Webless MOLLE/PALS surface on the sides of the pack specifically for breaching poles, cameras, or other small objects.
- Webless MOLLE/PALS surfaces on the outside of the pack for additional gear attachment
- Constructed of Squadron and 500D Cordura
- Optional feature for the use of scabbard insert, sold separately, to carry breaching tools, bolt cutters, breaching shotgun, etc. securely and quietly without interfering with the use of the pack
- Optional feature to attach a P7 Below Vest Accessory hanger using the Velcro in the scabbard channel
